DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5, 18-24, 37 and 38 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 5,392,289 to Varian in view of the examiner taking official notice.

As per claims 1 and 20, Varian discloses a pseudo-random sequence generator (col. 7, lines 43-55) and encoder and decoder col. 8, lines 34-41). The examiner takes official notice that a unique ID and hard disk drive used in this manner are very well known in the art. It would have been obvious to anyone having an ordinary level of skill in the art at the time the invention was made to modified the invention of Varian to include these features since they comprise essential components of such a system.

As per claims 2-5, 18, 19, 21-24, 37 and 38, it is further known that the limitations of these claims are well known features of a system typical of this.

Allowable Subject Matter

Claims 6-17, 25-36 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 5,923,814 to Boyce discloses Methods and Apparatus for Performing Video Data Reduction Operations and for Concealing the Visual Effects of Data Reduction Operations.
